SOURCE

1. Location:

South of Department No. 24 of the Stalin Plant in  
 Gorki (43°57'E/56°19'N), Gorki Oblast.

2. Plant installations:

The plant, though not damaged, gave the impression  
 of a battle ground with many buildings being con-  
 structed in August 1946. Detailed information can  
 only be given on the buildings reproduced on the  
 attached sketch. Three groups, each with two open-  
 hearth furnaces, one operating at a time, were at the  
 south side of the open hearth plant. They were con-  
 structed on bases with 15 steps and measured 5 x 5 me-  
 ters, 10 to 12 meters high, with an interior diameter  
 of 4 meters.

For plant sections and sketch of workshop see Annex.

3. Total work force:

About 20,000 laborers working three shifts.

4. Production:

Steel ingots in molds 25 x 25 x 120 cm, gun barrels  
 3 1/2 to 4 1/2 meters long, 18 to 22 cm thick.
